

Drawing is a major and parallel mode of expression for many of today's progressive architects. Therefore, we propose **2D3D**, a comprehensive annual exhibition of architectural drawings, to be inaugurated **March 25, 2010** in the Woodbury Hollywood Gallery (WUHO).

We invite you to submit your drawings for consideration. To register and get the FTP site uploading information please contact us before Tuesday, February 23, 2010 at WUHO.drawing.woodbury.edu

& FAST CHEAP OUT OF CONTROL

"Architectural drawings have a variety of uses: to instruct, inform, indulge, confuse, confirm, congratulate and console. The most worthwhile are those that undertake these essential architectural tasks on behalf of the producer rather than the consumer. When this is the case, which is rare, then such drawings do indeed become an integral part of the architecture they portray rather than a cypher for thoughts translated elsewhere, and by other means."

-Cedric Price

Exhibition dates
25 Mar
- 23 Apr
